Syllabus STA2023 – Introduction to Statistics I Fall 2021

1 INSTRUCTIONAL TEAM

	Course Coordinator	Lab Coordinator	Teaching Assistants
	Maria Ripol	Stephanie Stine	~20 TAs - names and emails available in Canvas
Email	mripol@stat.ufl.edu	s.stine@ufl.edu	
Office	Griffin Floyd 117C	Griffin Floyd 117B	Griffin Floyd 104 Tutoring Room
Phone	352-273-2976	352-273-2975	
office hours	Mon, Wed ONLINE Fri – IN PERSON 1:00 – 2:30 pm or by appointment	Mon - IN PERSON Wed, Thu - ONLINE 10:00 – 11:30am or by appointment	Mixture of ONLINE and IN PERSON – see Canvas for schedule
contact for:	Questions about quiz and exam grades. General questions about the course not answered on the syllabus or the homepage in Canvas.	Questions about lab.	Incorrectly recorded grades on lab worksheet. Course material – In Tutoring Room (see Canvas for schedule)
Website	Course website in Canvas at https://elearning.ufl.edu/ will have links for all ONLINE Office Hours and Tutoring		

2 MATERIALS

Lecture Notes – these are available two different ways. The best way is to print them (for free) from the course homepage in Canvas, or you can purchase them in the *Lab Workbook for Statistics: The Art and Science of Learning from Data* by Megan Mocko and Maria Ripol, 4th edition, 2017, Pearson ISBN: 9780133860894.

Lab Worksheets – needed for the lab portion of the course, and available to print from the course homepage in Canvas.

Scientific Calculator - You will need a calculator with some basic statistical functions: mean and standard deviation. Many inexpensive calculators (around \$15) have these functions; check the manual or look for the following symbols: x-bar and either s or σ n-1. Graphing calculators are NOT ALLOWED on exams.

Recommended Textbook: *Statistics: The Art and Science of Learning from Data* by Agresti, Franklin, Klingenberg, 4th edition, Pearson, 2017. You need to have access to the textbook in order to complete the suggested homework problems listed for each module- these are good practice to learn the material but do not count for your grade. There will be copies of the book available for you to use on reserve at the Marston Science Library and in our Tutoring Room. You can also purchase the textbook hardbound, or you can get it as an eText which allows you to complete the homework problems electronically, check your answers, and use the homework help for extra videos and examples. See Canvas for more details.

3 Course Description

STA 2023 is an introductory course that assumes no prior knowledge of statistics but does assume some knowledge of high school algebra. Basic statistical concepts and methods are presented in a manner that emphasizes understanding the principles of data collection and analysis rather than theory. Much of the course will be devoted to discussions of how statistics is commonly used in the real world. There are two major parts to this course:

I Data – which includes graphical and numerical summaries to describe the distribution of a variable, or the relationship between two variables (chapters 1, 2 and 3, approximately 3 weeks), and data production to learn how to design good surveys and experiments, collect data from samples that are representative of the whole population, and avoid common sources of biases (chapter 4, 1 week.)

II Probability and Inference – using the language of probability and the properties of numerical summaries computed from a random samples (chapters 5, 6 and 7, 4 weeks), we learn to draw conclusions about the population of interest, based on our random sample, and attach a measure of reliability to them (chapters 8, 9, 10 approximately 8 weeks).

Course Objective: The primary goal of the course is to help students understand how the process of posing a question, collecting data relevant to that question, analyzing data, and interpreting data can help them find answers to real problems from their world.

Structure of the Course: This course consists of:

- 36 Modules which include:
 - class material offered as live lectures, recorded lectures, or online interactive lessons
 - a short online quiz for each one
 - suggested homework problems from the textbook and additional examples
- 10 Labs to be completed weekly, in person, in CSE E231.
- 3 Exams also completed in person

4 LECTURES / LESSONS

In this hybrid course all students, regardless of which section they are registered for, have the option of:

- attending the live lectures offered MWF 8th period (3pm) in TUR L007
- watching the recordings of those lectures, available in Canvas about an hour after the live lecture ends (for technical problems contact the UF Help Desk http://helpdesk.ufl.edu/)
- accessing the material through online interactive lessons available in the Modules in Canvas

5 QUIZZES

There will be a short, 5 point quiz associated with each lecture / lesson. These quizzes will be completed in Canvas and students will have three chances for each quiz, with the highest score counting towards your grade. All quizzes will be open from the start of the semester, and will close at midnight one business day after the live lecture is taught. See calendar in Canvas for deadlines. For technical problems contact the UF Help Desk http://helpdesk.ufl.edu/

6 LABS

Students are required to attend Lab once a week, according to the section for which they are registered. Labs meet in CSE E231, which is located close to Turlington and the Marston Science Library. Worksheets with instructions will be posted in Canvas at least one week before labs meet. Students must PRINT these worksheets and bring them to lab. The worksheets must be turned in to the section TA before leaving Lab that day. They will be graded on a scale of 10 points. Students must be on time and will not get credit for the activity if they are more than five minutes late. Students must sign the attendance sheet for each Lab to show they arrived on time. Late students would disrupt the activity, and create problems for the rest of the students and the TA, so it will not be tolerated.

7 Exams

There will be three assembly exams, each worth 100 points. The two midterms are given at night, and the last one during final exam week. Each exam consists of 33 multiple choice questions, each worth 3 points apiece. This will total 99 points. You can earn the remaining 1 point by bringing a picture ID to the exam and by bubbling in your name, UF ID# and test code (listed on the front page of the exam) correctly. Exams will cover a larger amount of material that the quizzes and will also place more emphasis in the understanding of concepts and ideas behind the formulas.

Room assignments for each exam will be announced in class and on the website. The class will be divided up by sections. Bring to the exam your UFID number, a picture ID, no.2 pencils and eraser for completing the bubble sheets, and a scientific calculator. Graphing calculators may be NOT used during the exam. Accessing notes and formulas from the course during the exam is cheating. Accessing your cell phone or communicating with another individual during the exam is also considered cheating. Academic dishonesty on any exam will result in a minimum penalty of a grade of zero on that exam.

Exams	Date	Time	Chapters in Book	Modules
Exam 1	Tuesday, October 5 th	8:20 pm – 10: 00 pm (AT NIGHT)	Ch. 1 – Ch. 6 Sec. 3	1-16
Exam 2	Monday, November 8 th	8:20 pm – 10:00 pm (AT NIGHT)	Ch. 7 Sec. 1 – Ch. 9 Sec. 2	17-26
Exam 3	Saturday, December 11 th	12:30 – 2:10 pm (MID DAY)	Ch. 9 Ch. 10 Sec. 4	27-36

8 Makeup Policies

Quizzes: There are 36 quizzes during the semester, one associated with each Module. They must be completed by the deadline, one business day after the live lectures are taught. All quizzes are open from the beginning of the semester so students can work ahead if they need to, since all the material is also available as online interactive lessons posted from the start. Please complete the quizzes early if you have travel plans, religious observances, sports or club events, or any other conflict whether approved by the university or not. In addition to the 36 regular quizzes there will be three makeup quizzes available in Canvas during the last week and a half of the semester. All students can take as many of these three makeup quizzes as they want, either to replace a quiz they missed or one with a low grade.

Labs: There are 10 labs during the semester and students must attend the section they are registered for, and be on time. There will be three makeup labs available in Canvas during the last week and a half of the semester. All students can complete as many of these three makeup labs as they want, either to replace a lab they missed or one with a low grade. NOTE: If you know you will regularly have trouble attending the lab you are registered for or being on time you MUST CHANGE LAB SECTIONS IMMEDIATELY. This includes conflicts with travel, religious observances, sports or club events, or any other conflict whether approved by the university or not. There are usually plenty of opportunities to change sections during Drop/Add period. After Drop/Add is over, you will need to contact the Lab Coordinator to see if any changes are possible - see the top of this syllabus for the Lab Coordinator's contact information

Extenuating Circumstances: Sometimes students may be unable to complete their labs and quizzes due to extended hospitalization or illness, or some catastrophic event. They should avail themselves of the three makeup opportunities for quizzes and labs. In very rare instances these makeup opportunities are not enough. In these cases the student must meet with the Course Coordinator in person, during office hours, with all the appropriate documentation to discuss the situation. Each case will be reviewed individually.

Exams

- In case of conflict with a class: Assembly exams have priority over regularly scheduled classes. The
 instructor for the other class must allow you to make up any work you miss because of an assembly
 exam contact them early to make arrangements. This is a University of Florida policy, as stated on
 the Registrar's website https://catalog.ufl.edu/ugrad/current/regulations/info/exams.aspx
- In case of conflict with another exam: Assembly exams have priority over time-of-class exams. If you have two assembly exams scheduled for the same day and time, the course with the higher number has priority. This is a University of Florida policy, as stated on the Registrar's website (https://catalog.ufl.edu/ugrad/current/regulations/info/exams.aspx) Contact instructor of the appropriate class early, to make arrangements for a makeup exam do not wait until the last minute. If you need to schedule a makeup exam for STA 2023 because it conflicts with another assembly exam for a course with a higher number, you must contact the STA2023 Course Coordinator at least ONE WEEK prior to the regularly scheduled exam.
- In case of sudden illness or emergency: Contact the STA2023 Course Coordinator prior to the examas soon as you realize you will be unable to take the test at the scheduled time. Each case will be reviewed individually. Valid and detailed documentation is a prerequisite for scheduling a makeup

- exam under such extenuating circumstances. The STA2023 Course Coordinator must be contacted by midnight of the day of the exam via email or voice mail. If you are sick and have documentation you should NOT take the regular test but request a makeup there are no retakes.
- To make arrangements for a makeup exam: Contact the STA2023 Course Coordinator by email, in person during office hours, or through the phone (information appears at the top of this syllabus).
 Makeup exams will cover the same material as the regularly scheduled exam, but will not necessarily be in multiple choice format.
- Additional Note: Being on vacation is not a valid reason to request a makeup.

9 COURSE ASSESSMENT

Grade Structure	Percent
Exam 1	25%
Exam 2	25%
Exam 3	25%
Labs	12.5%
Quizzes	12.5%

Grading Scale			
Α	4.00	91 to 100%	
A-	3.67	89.5 to 90.99%	
B+	3.33	85.5 to 89.49%	
В	3.00	81 to 85.49%	
B-	2.67	78.5 to 80.99%	
C+	2.33	75.5 to 78.49%	
С	2.00	68.5 to 74.49%	
D	1.00	60 to 68.49%	
E	0.00	Below 60%	

Minimum grade of C is required for General Education credit. More information on grades and grading policies can be found here: https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx

10 How to Get the Most out of this Course

Time Commitment: Keep up with the class material, either by attending a live class, watching them online, or completing the interactive online lessons. Set aside time three times a week to work on the course material. Factor in time to complete your quizzes, and don't forget to attend lab each week, on time.

Choice: Remember the class material is available in three different formats – live lectures, recorded lectures and online interactive lectures. Each student should choose the one that works best for them. Everyone is welcome to attend the live lectures, but it may not be possible for you. The online

interactive lessons are all available well ahead of the time when the live lectures are delivered and recorded. If you know you will be out of town or very busy one week you may complete the lessons and quizzes ahead of time.

Watching Videos: You should watch the lectures within a day or two of it being posted. Watch the lectures one at a time at regular speed and then do the quiz and also a few suggested homework problems. Each section in the notes is labeled with chapter and section headings. If I ask the audience to work out a problem, this includes those who watch it online as well. Watch the lectures / lessons in a low disruption environment. In addition to watching the lecture, you should not also be texting, instant messaging, emailing, reading a website, watching tv, etc. Your attention should be focused on the lecture. I have carefully considered what needs to be discussed in class in our limited time frame. Make sure that you are paying attention to all of it. If you find that the online lectures are not working for you, consider going to the live lectures.

Getting Help: You can get **free help from all the TAs in the class in the Tutoring Room** that will be open about 40 hours per week in a mixture of ONLINE and IN PERSON tutoring hours. No appointments are necessary, and you don't need to go when your TAs are on duty. There is also free tutoring in **Broward Hall** - a schedule of their hours can be found at: www.teachingcenter.ufl.edu and through **Knack** at https://studentsuccess.ufl.edu/knack-tutoring. Both Broward and Knack offer tutoring for different classes, so check their websites for more details.

Quizzes: If you have questions on the quizzes, you are allowed to ask teaching assistants and the instructor about <u>submitted</u> attempts on the quiz only. For example, you can take the quiz one time, submit the quiz for grading. The teaching assistants in the Tutoring Room can help you with the problems with which you had questions. You can then go and try attempt 2 on your own. You are not allowed to complete quizzes in the tutoring room. If you send an email to the instructor about a quiz question, make sure that you take a screen shot of the question and include your full name in the email. Remember that you have several days and several tries for each quiz. Given all these opportunities, all students should do extremely well on the quizzes. Hopefully they will serve the purpose of improving your grade in the class, as well as be an important tool in learning the material for the course.

Labs: Each lab activity will require students to work in groups. Students are responsible for understanding the material covered in class and the quizzes from the previous modules so they can complete the activity by following the instructions on the worksheet. TAs will be in lab to facilitate the activity, but students are expected to work independently to explore the statistical concepts, with the help of their group and their notes, according to the principles of active learning. If a question arises, students should turn to other students in their group or table to discuss them.

Learn by Doing: You learn Statistics by doing Statistics. In addition to the lectures / lessons, quizzes and labs, there are suggested homework problems and additional examples in each module. You should do as much as you need to understand the material.

11 Course Policies

COVID-19: In response to COVID-19, the following practices are in place to maintain your learning environment, to enhance the safety of our in-classroom interactions, and to further the health and safety of ourselves, our neighbors, and our loved ones.

- If you are not vaccinated, get vaccinated. Vaccines are readily available at no cost and have been demonstrated to be safe and effective against the COVID-19 virus. Visit this link for details on where to get your shot, including options that do not require an appointment: https://coronavirus.ufhealth.org/vaccinations/vaccine-availability/. Students who receive the first dose of the vaccine somewhere off-campus and/or outside of Gainesville can still receive their second dose on campus.
- You are expected to wear approved face coverings at all times during class and within buildings even if you are vaccinated. Please continue to follow healthy habits, including best practices like frequent hand washing. Following these practices is our responsibility as Gators.
- Sanitizing supplies are available in the classroom if you wish to wipe down your desks prior to sitting down and at the end of the class. Hand sanitizing stations will be located in every classroom.
- If you are sick, stay home and self-quarantine. Please visit the UF Health Screen, Test & Protect website about next steps, retake the questionnaire and schedule your test for no sooner than 24 hours after your symptoms began. Please call your primary care provider if you are ill and need immediate care or the UF Student Health Care Center at 352-392-1161 (or email covid@shcc.ufl.edu) to be evaluated for testing and to receive further instructions about returning to campus. UF Health Screen, Test & Protect offers guidance when you are sick, have been exposed to someone who has tested positive or have tested positive yourself. Visit the UF Health Screen, Test & Protect website for more information.
- Course materials will be provided to you with an excused absence, and you will be given a reasonable amount of time to make up work.
- If you are withheld from campus by the Department of Health through Screen, Test & Protect you are not permitted to use any on campus facilities. Students attempting to attend campus activities when withheld from campus will be referred to the Dean of Students Office.
- Continue to regularly visit coronavirus.UFHealth.org and coronavirus.ufl.edu for up-to-date information about COVID-19 and vaccination. Privacy Policies: Student records are confidential. Only information designated "UF directory information" may be released without your written consent. UF views each student as the primary contact for all communication. If your parents contact me about your grade, attendance or other information that is not "UF directory information", I will ask them to contact you.

Privacy Policies: Student records are confidential. Only information designated "UF directory information" may be released without your written consent. UF views each student as the primary contact for all communication. If your parents contact me about your grade, attendance or other information that is not "UF directory information", I will ask them to contact you.

Privacy in Recorded Live Lectures: Our class sessions will be audio-visually recorded for students in the class to refer back and for enrolled students who are unable to attend live. If conducted through Zoom, students who participate with their camera engaged or utilize a profile image are agreeing to have their

video or image recorded. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate verbally are agreeing to have their voices recorded. If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type questions and comments live. The chat will not be recorded or shared. As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

Privacy in Zoom Tutoring and Office Hours: The Zoom Tutoring Room is open to all students to discuss course material. Any student who joins can listen in on your questions, as they would in the in-person tutoring room. However, the Office Hours for the Course Coordinator and the Lab Coordinator will only admit one student at a time, with any others being placed in a waiting room. So students can discuss any personal issues or problems with the instructor during office hours with the guarantee of confidentiality. Neither office hours nor tutoring will be recorded.

Email: Email relating to information about the class should be sent to your TA (emails listed on the "Contact Us" website in Canvas) or to the STA2023 Course Coordinator (see first section of this syllabus). Your message will be answered within two business days, in most cases. Please don't email all TAs or all instructors using the group email sending option in Canvas. We don't know who you intended to speak to. Please send email directly to the TA or lab or course coordinator and address them by name. However, we ask you to please refer to this syllabus, the course pages in Canvas to try to find the answers for yourself. Questions regarding the material covered in class, homework problems, or Lab should be asked in person, in the Tutoring Room, in Lab or in class. Statistical questions often require formulas or pictures, which can make it very hard to communicate by email. Emails should include your full name, UFID number and section number.

University's Honesty Policy: UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code (http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code/) specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the STA2023 Course Coordinator.

Students with Disabilities: Students with disabilities requesting accommodations should first register with the Disability Resource Center (352-392-8565, www.dso.ufl.edu/drc/) by providing appropriate documentation. Once registered, students will receive an accommodation letter which the student must present to the instructor when requesting accommodations. Students with disabilities should follow this procedure as early as possible in the semester. This letter must be discussed with the STA2023 Course Coordinator directly, not with the lab TA, for accommodations on exams to be made. Accommodations will not be made retroactively, but only forward from the day that the letter was received. Special circumstances should be discussed in person with the Course Coordinator.

Grading: Grades will be changed only when an error has been made; negotiation is not appropriate.

Incompletes are only assigned when extraordinary circumstances (such as an accident, or extended hospitalization), arising after the date for dropping the course, prevent the student from completing the course requirements. Having a failing grade in the course is not a valid reason for requesting an Incomplete. Information on **Medical Withdrawal** can be found at https://umatter.ufl.edu/ Information on how to **Drop a class** can be found in UF's Academic Catalog https://catalog.ufl.edu/

Instructor / Course Evaluations: Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals or in their Canvas course menu under GatorEvals.

12 OTHER UNIVERSITY SERVICES

U Matter, We Care: If you or someone you know is in distress, or needs information on services offered at UF, please contact them: 352-392-1575 umatter@ufl.edu https://umatter.ufl.edu/

Student Health Care Center: 352-392-1161 https://shcc.ufl.edu/

University Police Department, 352-392-1111 (or 9-1-1 for emergencies) http://www.police.ufl.edu

E-learning technical support – contact the UF Computing Help Desk: http://helpdesk.ufl.edu/

phone: 352-392-4357 e-mail: helpdesk@ufl.edu.

13 GENERAL EDUCATION OBJECTIVE AND STUDENT LEARNING OUTCOMES

This course satisfies general education credits in the mathematical sciences. Students learn how to summarize data and how to make appropriate decisions based on data. (This course is the general education category of M.)

General Education Objective (Mathematics)

Courses in mathematics provide instruction in computational strategies in fundamental mathematics including at least one of the following: solving equations and inequalities, logic, statistics, algebra, trigonometry, inductive and deductive reasoning. These courses include reasoning in abstract mathematical systems, formulating mathematical models and arguments, using mathematical models to solve problems and applying mathematical concepts effectively to real-world situations.

In this course, this objective will be met by . . .

During the semester the students will be given an introduction to the three main aspects of statistics: design (of experiments/surveys), description (of data collected) and inference (the extension of conclusions from the data gathered in the sample to the larger population). These

concepts will be presented through lectures three times a week and lab once a week. They will also learn about the normal and binomial distributions as well as the methodology of confidence intervals and significance tests. From the methods that they learn in class they will be able to critique real world surveys and experiments, interpret graphs in newspapers and magazines as well as conduct basic statistical inference for one or two groups.

General Education Student Learning Outcomes (SLOs)

Content: Students demonstrate competence in the terminology, concepts, methodologies and theories used within the discipline.

Communication: Students communicate knowledge, ideas, and reasoning clearly and effectively in written or oral forms appropriate to the discipline.

Critical Thinking: Students analyze information carefully and logically from multiple perspectives, using discipline specific methods and develop reasoned solutions to the problems.

In this course, these SLOs will be met by ...

Content: Students will learn critical terminology, concepts, methods, and theories during lecture. These concepts will include terminology to describe one and two samples, discuss surveys/experiments, basic probability theory, sampling distributions, and one and two group inference. The students will be assessed on these terms and concepts during the weekly quizzes and the three exams. Students will also demonstrate their competence in identifying the appropriate formulas to use for each situation and using those formulas correctly.

Communication: The students will use verbal and written communication to discuss central statistical concepts in their weekly labs. These concepts include description of data sets, sampling methods and interpretations of inference methodology.

Critical Thinking: The students will be asked to critically think about trustworthiness of surveys and experiments presented in the media. Additionally, students will learn how to conduct significance tests, a statistical method to logically determine if there is enough evidence for a hypothesis. Students will learn how to state the null and alternative hypotheses (different perspectives) and then to use the data collected to determine if there is enough evidence to support the alternative hypothesis using methods central to the field of statistics. The students will be tested on these concepts in lab, quiz and on two of the exams.

14 WEEKLY COURSE SCHEDULE

Quizzes on modules are due at midnight one business day after the material is covered in class - with the exception of the material covered before drop/add ends. See Canvas Calendar for more details.

	Monday	Wednesday	Friday
Week 1	8/23 Module 1:	8/25 Module 2: Graphs	8/27 Module 3:
NO LAB	Syllabus and	for Quantitative Data	Measuring Center and
	Introduction	Quiz due 8/31	Spread
	Quiz due 8/31	·	Quiz due 8/31
Week 2	8/30 Module 4:	9/01 Module 5:	9/03 Module 6:
Lab 1: Histograms	Quartiles and Boxplots	Intro to Regression	Regression Example
	Quiz due 8/31	Quiz due 9/02	Quiz due 9/07
Week 3	9/06	9/08 Module 7:	9/10 Module 8:
NO LAB	Labor Day Holiday	Cautions In Regression	Categorical Data
		Quiz due 9/09	Quiz due 9/13
Week 4	9/13 Module 9:	9/15 Module 10:	9/17 Module 11:
Lab 2: Regression	Sampling	Experiments	Other Considerations
	Quiz due 9/14	Quiz due 9/16	Quiz due 9/20
Week 5	9/20 Module 12:	9/22 Module 13:	9/24 Module 14:
Lab 3: Sampling	Basic Probability	Advanced Probability	Continuous Probability
	Quiz due 9/21	Quiz due 9/23	Distributions
			Quiz due 9/27
Week 6	9/27 Module 15:	9/29 Module 16:	10/01
Lab 4: Cont. Table	Discrete Probability	More Normal and	EXAM REVIEW
	Distributions	Binomial Examples	
	Quiz due 9/28	Quiz due 9/30	
Week 7	10/04	10/06 Module 17:	10/08
NO LAB	Q&A	Sampling Distribution	Homecoming
		of p-hat	NO CLASS
	EXAM 1	Quiz due 10/11	
	TUESDAY NIGHT		
Week 8	10/11 Module 18:	10/13 Module 19:	10/15 Module 20:
Lab 5: Sampling	Sampling Distribution	More Sampling	Confidence Intervals
Distribution of p-	of x-bar	Distribution Problems	for p
hat	Quiz due 10/12	Quiz due 10/14	Quiz due 10/18
Week 9	10/18 Module 21:	10/20 Module 22:	10/22 Module 23:
Lab 6: Sampling	Confidence Intervals	More on Confidence	Sample Size, Small
Distribution of x-	for µ	Intervals	Sample CI for p and
bar	Quiz due 10/19	Quiz due 10/21	Bootstrap
			Quiz due 10/25
Week 10	10/25 Module 24:	10/27 Module 25:	10/29 Module 26:
Lab 7: Confidence	Basics of Significance	More about P-values	More Significance Tests
Intervals for μ	Tests	and Significance Tests	for Proportions
	Quiz due 10/26	for Proportions	Examples
		Quiz due 10/28	Quiz due 11/01

Week 11	11/01 Module 27:	11/03 Module 28:	11/05
Lab 8: Significance	Significance Tests for	Relationship between	
Test for p	Means	CI and Sig Tests	EXAM REVIEW
	Quiz due 11/02	Quiz due 11/04	
Week 12	11/08	11/10 Module 29:	11/12 Module 30:
NO LAB		Other Considerations	Comparing Two
	Q&A	about Sig Tests	Independent
		Quiz due 11/11	Proportions
	EXAM 2		Quiz due 11/15
	TONIGHT		
Week 13	11/15 Module 31:	11/17 Module 32:	11/19 Module 33:
Lab 9: Significance	Comparing Two	Comparing Two	McNemar's Test and
Test for μ	Independent Means	Dependent Means	Permutation Tests
	Quiz due 11/16	Quiz due 11/18	Quiz due 11/29
Week 15	11/22	11/24	11/26
NO LAB	Flex Day	Thanksgiving	Holiday
Week 14	11/29 Module 34:	12/01 Module 35:	12/03 Module 36:
Lab 10: Comparing	Review – Part 1	Review – Part 2	Review – Part 3
Two Groups	Quiz due 11/30	Quiz due 12/02	Quiz due 12/06
Week 16	12/06	12/08	Reading Days
NO LAB		Flex Day	NO CLASS
	Q&A		

EXAM 3 – Saturday 12/11 12:30 – 2:10 pm

NOTE – this calendar is subject to change, if necessary
