

Syllabus

STA2023 – Introduction to Statistics I

Spring 2021

1 INSTRUCTIONAL TEAM

	Course Coordinator	Lab Coordinator	Teaching Assistants
Email	Stephanie Stine s.stine@ufl.edu	Maria Ripol mripol@stat.ufl.edu	~16 TAs - names and emails available in Canvas
Zoom Office hours	MWR 10:00 am – 11:30 am via Zoom only, or by appointment. Zoom link	MWF 2:00 pm – 3:00 pm via Zoom only, or by appointment. Zoom link	In Zoom Tutoring Room (see Canvas for schedule)
Contact for:	Questions about quiz and exam grades. General questions about the course not answered on the syllabus or the homepage in Canvas.	Questions about Lab.	Problems with Lab grades. Course material – In Tutoring Room (see Canvas for schedule)
Website	Course website in Canvas at http://www.elearning.ufl.edu		

2 MATERIALS

Lecture Notes: These are needed to follow along with the lectures. You can print them from the course homepage in Canvas under the “Lecture Notes” link. Alternatively, you can use them electronically if your device is able to write on a pdf.

Scientific Calculator: You will need a calculator with some basic statistical functions: mean and standard deviation. Many inexpensive calculators (around \$15) have these functions; check the manual or look for the following symbols: \bar{x} and either s or σ .

Textbook (optional): *Statistics: The Art and Science of Learning from Data* by Agresti, Franklin, Klingenberg, 4th edition, Pearson, 2017. Textbook can be purchased or rented ISBN13: 9780321997838; or opt in to UF All Access to access the etext - see [flyer](#) for details. Opting in to the etext will give you access to MyLab and Mastering which also gives you the ability to do the optional practice homework problems (not graded) electronically for each Module. Use these additional [directions](#) (start at #7) on how to use the opt in access code to get MyLab and Mastering access.

3 COURSE DESCRIPTION

STA 2023 is an introductory course that assumes no prior knowledge of statistics but does assume some knowledge of high school algebra. Basic statistical concepts and methods are presented in a manner that emphasizes understanding the principles of data collection and analysis rather than theory. Much of the course will be devoted to discussions of how statistics is commonly used in the real world. There are two major parts to this course:

I Data – which includes graphical and numerical summaries to describe the distribution of a variable, or the relationship between two variables (chapters 1, 2 and 3, approximately 3 weeks), and data production to learn how to design good surveys and experiments, collect data from samples that are representative of the whole population, and avoid common sources of biases (chapter 4, 1 week.)

II Probability and Inference – using the language of probability and the properties of numerical summaries computed from a random sample (chapters 5, 6 and 7, 4 weeks), we learn to draw conclusions about the population of interest, based on our random sample, and attach a measure of reliability to them (chapters 8, 9, 10 approximately 8 weeks).

Course Objective: The primary goal of the course is to help students understand how the process of posing a question, collecting data relevant to that question, analyzing data, and interpreting data can help them find answers to real world problems.

Structure of the Course: This course consists of:

- 36 Modules which include:
 - class material taught three times a week. See the Lectures/Lessons section on the next page for more information pertaining to this semester.
 - a short online quiz for each one
- 10 Labs to be completed weekly, online through Canvas.
- 3 Exams completed online through Canvas, proctored by Honorlock.

4 LECTURES / LESSONS

This is a hybrid course. Depending on which section you are registered for the options are:

- **Face-to-Face lecture (sections 18842 and 18843 ONLY):** The live face-to-face lectures for these two sections only are MWF 2nd period (8:30am – 9:20am) in NRN1020. See the face-to-face Covid-19 policy below.
- **Live Zoom lecture:** All other sections can attend the live Zoom lecture MWF 2nd period (8:30am – 9:20am). The Zoom lecture link is on the Canvas home page for the class.
- **Lecture Recordings:** All sections can watch the recordings of the MWF lectures, available in Canvas soon after the live lecture ends.
- **Online Interactive Lessons:** All sections can access the material through online interactive lessons available in the Modules in Canvas.

Face-to-face lectures (sections 18842 and 18843 ONLY): We will have face-to-face instructional sessions to accomplish the student learning objectives of this course. In response to COVID-19, the following policies and requirements are in place to maintain your learning environment and to enhance the safety of our in-classroom interactions.

- You are required to wear approved face coverings at all times during class and within buildings. Following and enforcing these policies and requirements are all of our responsibility. Failure to do so will lead to a report to the Office of Student Conduct and Conflict Resolution.
- This course has been assigned a physical classroom with enough capacity to maintain physical distancing (6 feet between individuals) requirements. Please utilize designated seats and maintain appropriate spacing between students. Please do not move desks or stations.
- Sanitizing supplies are available in the classroom if you wish to wipe down your desks prior to sitting down and at the end of the class.
- Follow your instructor's guidance on how to enter and exit the classroom. Practice physical distancing to the extent possible when entering and exiting the classroom.
- If you are experiencing COVID-19 symptoms ([Click here for guidance from the CDC on symptoms of coronavirus](#)), please use the UF Health screening system and follow the instructions on whether you are able to attend class. [Click here for UF Health guidance on what to do if you have been exposed to or are experiencing Covid-19 symptoms](#).
 - Course materials will be provided to you with an excused absence, and you will be given a reasonable amount of time to make up work. [Find more information in the university attendance policies](#).

Zoom Privacy Information: Our class sessions will be audio visually recorded for students in the class to refer back and for enrolled students who are unable to attend live. Students who participate with their camera engaged or utilize a profile image are agreeing to have their video or image recorded. If you are unwilling to consent to have your profile or video image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who un-mute during class and participate orally are agreeing to have their voices recorded. If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the "chat" feature, which allows students to type questions and comments live. The chat will not be recorded or shared. As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

5 QUIZZES

There will be a short, 5 point quiz associated with each lecture / lesson. These quizzes will be completed in Canvas and students will have three chances for each quiz, with the highest score counting towards your grade. All quizzes will be open from the start of the semester, and will close at 11:59pm EST one business day after the live lecture is taught. See calendar in Canvas for deadlines. For technical problems contact the UF Computing Help Desk <http://helpdesk.ufl.edu/>

6 LABS

All students are registered for one Lab period a week, by section number. For this semester Labs will be completed online in Canvas. Labs will require students to read some information, answer questions related to a computer output, complete a short statistical analysis and upload the results to Canvas. Labs will be graded on a scale of 10 points with three attempts given per Lab. Labs will be assigned weekly, with the deadline being Friday 11:59pm EST of the week the Lab is assigned.

7 EXAMS

There will be three assembly exams, each worth 100 points. The days and times are determined by the registrar. The two midterms are usually in the evening, and the last exam is during the final exam week. Each exam consists of 33 multiple choice questions, each worth 3 points apiece. This will total 99 points. You can earn the remaining 1 point by answering the Honor Code question. Exams will cover a larger amount of material than the quizzes and will also place more emphasis in the understanding of concepts and ideas behind the formulas.

This semester all three exams will be online, proctored by Honorlock. All exams are closed book, closed notes and closed Internet. A digital formula sheet will be provided for you, including any statistical tables required. A wired connection is preferable (it is more stable), otherwise use a wireless connection. You may use a scientific calculator during the exam. Graphing calculators, TI-npires, smart devices, or any type of device that connects to the Internet or other people are not allowed. Accessing notes and formulas from the course during the exam is cheating. Accessing your cell phone, smart device or communicating with another individual during the exam is also considered cheating. Academic dishonesty on any exam will result in a minimum penalty of a grade of *zero* on that exam.

Exams	Date	Time	Chapters in Book	Modules
Exam 1	TBA	TBA	Ch. 1 – Ch. 6 Sec. 3	1-16
Exam 2	TBA	TBA	Ch. 7 Sec. 1 – Ch. 9 Sec. 3	17-26
Exam 3	Saturday, April 24	12:30 pm – 2:10 pm (AFTERNOON)	Ch. 9 -- Ch. 10 Sec. 4	27-36

8 MAKEUP POLICIES

Quizzes: There are 36 quizzes during the semester, one associated with each Module. They must be completed by the deadline, one business day after the live lectures are taught. All quizzes are open from the beginning of the semester so students can work ahead if they need to, since all the material is also available as online interactive lessons posted from the start. Please complete the quizzes early if you have travel plans, religious observances, sports or club events, or any other conflict whether approved by the university or not. In addition to the 36 regular quizzes there will be three makeup quizzes available in Canvas during the last week and a half of the semester. All students can take as many of these three makeup quizzes as they want, either to replace a quiz they missed or one with a low grade.

Labs: There are 10 labs during the semester and students must complete them by the given deadline each week. There will be three makeup labs available in Canvas during the last week and a half of the semester. All students can complete as many of these three makeup labs as they want, either to replace a lab they missed or one with a low grade.

Extenuating Circumstances: Sometimes students may be unable to complete their labs and quizzes due to extended hospitalization or illness, or some catastrophic event. They should avail themselves of the three makeup opportunities for quizzes and labs. In very rare instances these makeup opportunities are not enough, the student must meet with the Course Coordinator in person, during office hours, with all the appropriate documentation to discuss the situation. Each case will be reviewed individually.

Exams:

- **In case of conflict with a class:** Assembly exams have priority over regularly scheduled classes. The instructor for the other class must allow you to make up any work you miss because of an assembly exam - contact them early to make arrangements. This is a University of Florida policy, as stated on the Registrar's website <https://catalog.ufl.edu/ugrad/current/regulations/info/exams.aspx>
- **In case of conflict with another exam:** Assembly exams have priority over time-of-class exams. If you have two assembly exams scheduled for the same day and time, the course with the higher number has priority. This is a University of Florida policy, as stated on the Registrar's website (<https://catalog.ufl.edu/ugrad/current/regulations/info/exams.aspx>) Contact instructor of the appropriate class early, to make arrangements for a makeup exam - do not wait until the last minute. If you need to schedule a makeup exam for STA 2023 because it conflicts with another assembly exam for a course with a higher number, you must contact the STA 2023 Course Coordinator at least ONE WEEK prior to the regularly scheduled exam.
- **In case of sudden illness or emergency:** Contact the STA 2023 Course Coordinator **prior** to the exam - as soon as you realize you will be unable to take the test at the scheduled time. Each case will be reviewed individually. Valid and detailed documentation is a prerequisite for scheduling a makeup exam under such extenuating circumstances. The STA 2023 Course Coordinator must be contacted by midnight of the day of the exam via email or voice mail. If you are sick and have documentation you should NOT take the regular test but request a makeup – there are no retakes.

- **To make arrangements for a makeup exam:** Contact the STA 2023 Course Coordinator by email, in person during office hours, or through the phone (information appears at the top of this syllabus). Makeup exams will cover the same material as the regularly scheduled exam, but will not necessarily be in the same format.
- **Additional Note:** Being on vacation is not a valid reason to request a makeup.

9 COURSE ASSESSMENT

Grade Structure	Percent
Exam 1	25%
Exam 2	25%
Exam 3	25%
Labs	12.5%
Quizzes	12.5%

Grading Scale		
A	4.00	91 to 100%
A-	3.67	89.5 to 90.99%
B+	3.33	85.5 to 89.49%
B	3.00	81 to 85.49%
B-	2.67	78.5 to 80.99%
C+	2.33	75.5 to 78.49%
C	2.00	68.5 to 75.49%
D	1.00	60 to 68.49%
E	0.00	Below 60%

Minimum grade of C is required for General Education credit.

Current UF grading policies for assigning grade points can be found at:

<https://catalog.ufl.edu/UGRD/academic-regulations/grades-grading-policies/>

10 HOW TO GET THE MOST OUT OF THIS COURSE

Time Commitment: Keep up with the class material, either by attending a live Zoom class, watching the recordings, or completing the interactive online lessons. Set aside time three times a week to work on the course material. Factor in time to complete your quizzes, and don't forget to complete the assigned Lab each week, by the deadline.

Choice: Remember the class material is available in three different formats – Zoom live lectures, recorded lectures and online interactive lectures. Each student should choose the one that works best for them. ONLY sections 18842 and 18843 can attend the live face-to-face lectures (Covid-19 policy). The online interactive lessons are all available well ahead of the time when the live lectures are delivered and recorded. If you know you will be out of town or very busy one week you may complete the lessons and quizzes ahead of time.

Watching Videos: You should watch the lecture within a day or two of it being posted. Watch the lectures one at a time at regular speed and then do the quiz and also a few suggested homework problems. Each section in the notes is labeled with chapter and section headings. If I ask the audience to work out a problem, this includes those who watch it online as well. Watch the lectures / lessons in a low disruption environment. In addition to watching the lecture, you should not also be texting, instant messaging, emailing, reading a website, watching tv, etc. Your attention should be focused on the lecture. I have carefully considered what needs to be discussed in class in our limited time frame. Make sure that you are paying attention to all of it. If you find that the online lectures are not working for you, consider going to the live lectures.

Quizzes and Labs: If you have questions on the quizzes or Labs, you are allowed to ask teaching assistants or the instructor about submitted attempts only. For example, you can take the quiz one time, submit the quiz for grading. The teaching assistants in the Zoom Tutoring Room can help you with the problems with which you had questions. You can then go and try the next attempt on your own. You are not allowed to complete quizzes and Labs by asking one of the TAs to provide you with the answers. If you send an email to the instructor about a quiz or Lab question, make sure that you take a screen shot of the question and include your full name in the email. Remember that you have several days and several tries for each quiz and Lab. Given all these opportunities, all students should do extremely well on the quizzes and Labs. Hopefully they will serve the purpose of improving your grade in the class, as well as be an important tool in learning the material for the course.

Learn by Doing: You learn Statistics by doing Statistics. In addition to the lectures / lessons, quizzes and Labs, there are suggested homework problems (not graded) and additional examples in each module. You should do as much as you need to understand the material.

Getting Help: You can get free help from all the TAs in the class in the Zoom Tutoring Room that will be open about 40 hours per week. No appointments are necessary, and you don't need to go when your TAs are on duty. There is also free tutoring in Broward Hall - a schedule of their hours can be found at: <http://teachingcenter.ufl.edu/>. Knack is a new tutoring service that is also available at <https://studentsuccess.ufl.edu/knack-tutoring>.

11 COURSE POLICIES

Privacy Policies: Student records are confidential. Only information designated "UF directory information" may be released without your written consent. UF views each student as the primary contact for all communication. If your parents contact me about your grade, attendance or other information that is not "UF directory information", I will ask them to contact you.

Privacy in Zoom Tutoring and Office Hours: The Zoom Tutoring Room is open to all students to discuss course material. Any student who joins can listen in on your questions, as they would in the in-person tutoring room. However, the Office Hours for the Course Coordinator and the Lab Coordinator will admit one student at a time, with any other being placed in a waiting room. So, students can discuss any personal issues or problems with the instructor during office hours with the guarantee of confidentiality. Neither the office hours nor tutoring will be recorded.

Email: Email relating to information about the class should be sent to your TA (via Canvas email) or to the STA 2023 Course Coordinator (see first section of this syllabus). Your message will be answered within two business days, in most cases. Please don't email all TAs or all instructors using the group email sending option in Canvas. We don't know who you intended to speak to. Please send email directly to the TA or Lab or Course Coordinator and address them by name. However, we ask you to please refer to this syllabus, the course pages in Canvas to try to find the answers for yourself. Questions regarding the material covered in class, homework problems, or Lab should be asked in person, in the Tutoring Room, in Lab or in class. Statistical questions often require formulas or pictures, which can make it very hard to communicate by email. Emails should include your full name, UFID number and section number.

University's Honesty Policy: UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Honor Code specifies a number of behaviors that are in violation of this code and the possible sanctions. [Click here to read the Honor Code](#). Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the STA 2023 Course Coordinator.

Students with Disabilities: Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the disability Resource Center. [Click here to get started with the Disability Resource Center](#). It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester. This letter must be discussed with the STA 2023 Course Coordinator directly, not with the Lab TA, for accommodations on exams to be made. Accommodations will not be made retroactively, but only forward from the day that the letter was received. Special circumstances should be discussed in person with the Course Coordinator.

Class Attendance and Behavior: Attendance to the live Zoom lectures is not mandatory since you will be able to watch the recorded lectures online. ONLY sections 18842 and 18843 can attend the face-to-face lectures (Covid-19 policy).

Grading: Grades will be changed only when an error has been made; negotiation is not appropriate.

Incompletes: These are only assigned when extraordinary circumstances (such as an accident, or extended hospitalization), arising after the date for dropping the course, prevent the student from completing the course requirements. Having a failing grade in the course is not a valid reason for requesting an Incomplete.

Instructor / Course Evaluations: Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. [Click here for guidance on how to give feedback in a professional and respectful manner](#). Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via ufl.bluera.com/ufl/. [Summaries of course evaluation results are available to students here](#).

12 OTHER UNIVERSITY SERVICES

Health and Wellness

U Matter, We Care: If you or someone you know is in distress, please contact umatter@ufl.edu, 352-392-1575, or visit [U Matter, We Care website](#) to refer or report a concern and a team member will reach out to the student in distress.

Counseling and Wellness Center: [Visit the Counseling and Wellness Center website](#) or call 352-392-1575 for information on crisis services as well as non-crisis services.

Student Health Care Center: Call 352-392-1161 for 24/7 information to help you find the care you need, or [visit the Student Health Care Center website](#).

University Police Department: [Visit UF Police Department website](#) or call 352-392-1111 (or 9-1-1 for emergencies).

UF Health Shands Emergency Room / Trauma Center: For immediate medical care call 352-733-0111 or go to the emergency room at 1515 SW Archer Road, Gainesville, FL 32608; [Visit the UF Health Emergency Room and Trauma Center website](#)

13 GENERAL EDUCATION OBJECTIVE AND STUDENT LEARNING OUTCOMES

This course satisfies general education credits in the mathematical sciences. Students learn how to summarize data and how to make appropriate decisions based on data. (This course is the general education category of M.)

General Education Objective (Mathematics)

Courses in mathematics provide instruction in computational strategies in fundamental mathematics including at least one of the following: solving equations and inequalities, logic, statistics, algebra, trigonometry, inductive and deductive reasoning. These courses include reasoning in abstract mathematical systems, formulating mathematical models and arguments, using mathematical models to solve problems and applying mathematical concepts effectively to real-world situations.

In this course, this objective will be met by . . .

During the semester the students will be given an introduction to the three main aspects of statistics: design (of experiments/surveys), description (of data collected) and inference (the extension of conclusions from the data gathered in the sample to the larger population). These concepts will be presented through lectures three times a week and Lab once a week. They will also learn about the normal and binomial distributions as well as the methodology of confidence intervals and significance tests. From the methods that they learn in class they will be able to critique real world surveys and experiments, interpret graphs in newspapers and magazines as well as conduct basic statistical inference for one or two groups.

General Education Student Learning Outcomes (SLOs)

Content: Students demonstrate competence in the terminology, concepts, methodologies and theories used within the discipline.

Communication: Students communicate knowledge, ideas, and reasoning clearly and effectively in written or oral forms appropriate to the discipline.

Critical Thinking: Students analyze information carefully and logically from multiple perspectives, using discipline specific methods and develop reasoned solutions to the problems.

In this course, these SLOs will be met by . . .

Content: Students will learn critical terminology, concepts, methods, and theories during lecture.

These concepts will include terminology to describe one and two samples, discuss surveys/experiments, basic probability theory, sampling distributions, and one and two group inference. The students will be assessed on these terms and concepts during the weekly quizzes and the three exams. Students will also demonstrate their competence in identifying the appropriate formulas to use for each situation and using those formulas correctly.

Communication: The students will use verbal and written communication to discuss central statistical concepts in their weekly Labs. These concepts include description of data sets, sampling methods and interpretations of inference methodology.

Critical Thinking: The students will be asked to critically think about trustworthiness of surveys and experiments presented in the media. Additionally, students will learn how to conduct significance tests, a statistical method to logically determine if there is enough evidence for a hypothesis. Students will learn how to state the null and alternative hypotheses (different perspectives) and then to use the data collected to determine if there is enough evidence to support the alternative hypothesis using methods central to the field of statistics. The students will be tested on these concepts in Lab, quiz and on two of the exams.

14 WEEKLY COURSE SCHEDULE

Quizzes on modules are due at 11:59pm EST one business day after the material is covered in class - with the exception of the material covered before drop/add. See Canvas Calendar for more details. Labs are due by Friday 11:59pm EST of the week they are assigned.

	Monday	Wednesday	Friday
Week 1 (no lab)	1/11 Module 1: Syllabus and Introduction <i>Quiz due 1/21</i>	1/13 Module 2: Graphs for Quantitative Data <i>Quiz due 1/21</i>	1/15 Module 3: Measuring Center and Spread <i>Quiz due 1/21</i>
Week 2 (no lab)	1/18 MLK Holiday No Class	1/20 Module 4: Quartiles and Boxplots <i>Quiz due 1/21</i>	1/22 Module 5: Intro to Regression <i>Quiz due 1/25</i>
Week 3 (Lab 1: Histograms)	1/25 Module 6: Regression Example <i>Quiz due 1/26</i>	1/27 Module 7: Cautions in Regression <i>Quiz due 1/28</i>	1/29 Module 8: Categorical Data <i>Quiz due 2/1</i>
Week 4 (Lab 2: Regression)	2/1 Module 9: Sampling <i>Quiz due 2/2</i>	2/3 Module 10: Experiments <i>Quiz due 2/4</i>	2/5 Module 11: Other Considerations <i>Quiz due 2/8</i>
Week 5 (Lab 3: Sampling)	2/8 Module 12: Basic Probability <i>Quiz due 2/9</i>	2/10 Module 13: Advanced Probability <i>Quiz due 2/11</i>	2/12 Module 14: Continuous Probability Distributions <i>Quiz due 2/15</i>
Week 6 (Lab 4: Cont. Table)	2/15 Module 15: Discrete Probability Distributions <i>Quiz due 2/16</i>	2/17 Module 16: More Normal and Binomial Examples <i>Quiz due 2/18</i>	2/19 EXAM 1 REVIEW
Week 7 (no lab) EXAM WEEK	2/22 Q&A Monday 2/22 EXAM 1 starts 8:20pm	2/24 Module 17: Sampling Distribution of p-hat <i>Quiz due 2/25</i>	2/26 Module 18: Sampling Distribution of x-bar <i>Quiz due 3/1</i>
Week 8 (Lab 5: Sampling Distribution of p-hat)	3/1 Module 19: More Sampling Distribution Problems <i>Quiz due 3/2</i>	3/3 Module 20: Confidence Intervals for p <i>Quiz due 3/4</i>	3/5 Module 21: Confidence Intervals for μ <i>Quiz due 3/8</i>
Week 9 (Lab 6: Sampling Distribution of x-bar)	3/8 Module 22: More on Confidence Intervals <i>Quiz due 3/9</i>	3/10 Module 23: Sample Size, Small Sample CI for p and Bootstrap <i>Quiz due 3/11</i>	3/12 Module 24: Basics of Significance Tests <i>Quiz due 3/15</i>
Week 10 (Lab 7: Confidence Intervals for μ)	3/15 Module 25:	3/17 Module 26:	3/19 EXAM 2 REVIEW

	More about P-values and Significance Tests for Proportions <i>Quiz due 3/16</i>	More Significance Tests for Proportions Examples <i>Quiz due 3/18</i>	
Week 11 (no lab) EXAM WEEK	3/22 Q&A Monday 3/22 EXAM 2 starts 8:20pm	3/24 Recharge Day No class	3/26 Module 27: Significance Tests for Means <i>Quiz due 3/29</i>
Week 12 (Lab 8: Significance Test for p)	3/29 Module 28: Relationship between CI and Sig Tests <i>Quiz due 3/30</i>	3/31 Module 29: Other Considerations about Sig Tests <i>Quiz due 4/1</i>	4/2 Module 30: Comparing Two Independent Proportions <i>Quiz due 4/5</i>
Week 13 (Lab 9: Significance Test for μ)	4/5 Module 31: Comparing Two Independent Means <i>Quiz due 4/6</i>	4/7 Module 32: Comparing Two Dependent Means <i>Quiz due 4/8</i>	4/9 Module 33: McNemar's Test and Permutation Tests <i>Quiz due 4/12</i>
Week 14 (Lab 10: Comparing Two Groups)	4/12 Module 34: Review – Part 1 <i>Quiz due 4/13</i>	4/14 Module 35: Review – Part 2 <i>Quiz due 4/15</i>	4/16 Module 36: Review – Part 3 <i>Quiz due 4/19</i>
Week 16 (no lab)	4/19 Exam 3 Review	4/21 Q&A	<i>Reading Day</i>

EXAM 3 – Saturday 4/24 12:30 pm – 2:10 pm
