Text: Applied Linear Statistical Models, 5th Ed. by Kutner, Nachtsheim, Neter and Li (Chapters 15-30)

Course Description

This course provides an introduction to the design and analysis of statistical experiments. Experimental design techniques are used in a wide variety of academic, industrial, and scientific areas. We will cover widely used designs, and discuss practical and computational issues regarding their analysis.

Other Materials: Datasets, assignments, and overheads available on class website and UF Canvas.

Web Site: <http://www.stat.ufl.edu/~winner/>

Homework and Exams:

1. **Homework Assignments:** There will be approximately 5 assignments. You will have at least 10 days to upload them to UF Canvas from the time they are posted. Assignments will total 100 points.
2. **Exams:** There will be 3 “in-class exams”. Each will be worth 100 points. For each exam, you may use 1 hand-written 8.5x11” sheet of paper with formulas and/or notes. There will also be a Take-Home component due at the beginning of each exam.
3. **Grading:** Grades will be based on the total of 400 points from homework and exams. Grades are not negotiable (unless a mis-calculation is made in totaling points).
4. **Missed Exams:** Any exams that will be missed must be confirmed as soon as possible, **before** the time of the exam. Documentation must be provided. No early exams will be given under any circumstances.
5. **Late Homework:** Will not be accepted and will receive a grade of 0. No e-mail will be accepted.

Prerequisites and Computing:

1. STA 4211 has a pre-requisite of STA 4210.
2. You will need a computer for homework assignments. Examples will make use of EXCEL and R; but you will need to make use of R for assignments.
